

Integrated Technical Design Report

Phases A-D accelerated technical concept masterpack

PROJECT	Moskee Haci Bayram - BB35 Pilot 1
LOCATION	Bikkersweg 88, Bunschoten
ISSUE	2026-07-27
STATUS	CONCEPT - NOT FOR SUBMISSION OR EXECUTION

This report contains actual generated concept deliverables. It is not a professional certification and is not approved for permit submission or construction.

1. Executive summary

The accelerated masterpack executes phases A-D in one transaction and creates revision C02.
All four internal gates pass. The package remains a technical concept because six professional evidence packages are not yet accepted.

TECHNICAL CONCEPT - NOT FOR PERMIT SUBMISSION OR EXECUTION

Phase	Name	Gate	Deliverables
A	Architectural	PASSED	9
B	Technical Design and Detailing Multidisciplinary Engineering	PASSED	9
C	Integration Technical Coordination and	PASSED	7
D	Clash Control Permit Tender Execution Concept Issue	PASSED	9

2. Design basis

Extension: 7 x 10 m, two storeys, 140 m2 gross. Central model: 299 objects. Parking basis:
225 project-leader-confirmed spaces. REQ-107 remains closed.

3. Phase A - architectural technical design

Component assemblies, technical details, accessibility, building physics, doors, windows and room finishes are coordinated as a concept design freeze.

Register	Count
Assemblies	16
Detail sheets	12
Doors	12
Windows	8
Rooms	12

4. Phase B - multidisciplinary engineering

Structural, foundation, MEP, drainage, fire, site/parking and AERIUS interfaces are integrated. Specialist calculations and declarations remain mandatory.

5. Phase C - technical coordination

Twenty-four clash checks, twenty discipline interfaces and twenty-four coordination checks are recorded. Concept conflicts are resolved or retained as explicit conditions.

6. Phase D - issue preparation

Permit, tender and execution concept indexes are generated, but none are released as final.

Issue type	Items	Ready
Permit concept	24	No
Tender concept	28	No
Execution concept	32	No

7. Evidence boundary

REQ-102, REQ-103, REQ-104, REQ-105, REQ-106 and REQ-108 must be replaced and accepted before revision C03 may be considered permit-ready.
