

Bbl, fire safety and ventilation concept report

Occupancy, escape route and ventilation design basis

PROJECT	Uitbreiding moskee Haci Bayram
LOCATION	Bikkersweg 88, Bunschoten
ISSUE	2026-07-27
STATUS	CONCEPT - NOT FOR SUBMISSION OR EXECUTION

This report contains actual generated concept deliverables. It is not a professional certification and is not approved for permit submission or construction.

1. Occupancy basis

The review basis uses 150 regular future occupants, 125 Friday occupants and 200 persons for the annual special peak.

2. Escape concept

The concept drawing shows 2 independent exits, each 1.20 m wide, for a total simulated width of 2.40 m.

Field 1	Field 2
Exit count	2
Width per exit	1.20 m
Total width	2.40 m
Compliance conclusion	NOT_MADE_IN_CONCEPT_PRODUCTION

3. Ventilation concept

Ventilation is to be sized from verified room functions, occupancy profiles and Bbl requirements. The current issue records the spatial basis only and does not state compliance.

4. Required evidence

Signed fire-safety and evacuation assessment.

Verified travel distances, compartmentation and resistance requirements.

Ventilation calculations and installation design.

Accessibility and sanitary review.
