

Parking concept report

Capacity basis, synthetic demand and measurement programme

PROJECT	Uitbreiding moskee Haci Bayram
LOCATION	Bikkersweg 88, Bunschoten
ISSUE	2026-07-27
STATUS	CONCEPT - NOT FOR SUBMISSION OR EXECUTION

This report contains actual generated concept deliverables. It is not a professional certification and is not approved for permit submission or construction.

1. Capacity basis

The project leader confirmed 225 public spaces in the direct surroundings. The previous 300-space hypothesis is superseded. Field verification is still required.

Field 1	Field 2	Field 3
P-A	Directe parkeerzone noord	70
P-B	Sportcluster west	50
P-C	Openbare stroken zuid	40
P-D	Voorzieningencluster oost	35
P-E	Overige directe omgeving	30

2. Synthetic demand test

The production run carries forward the simulation demand values solely to test the reporting chain.

Field 1	Field 2	Field 3	Field 4
Regular future	30	55	25
Friday future	25	55	30
Special peak	40	55	15

3. Measurement programme

Five field moments must be counted, including Friday prayer. Raw count sheets, mapped public/private restrictions, photographs and a professional parking balance are required.

4. Status

The 225-space basis is project-leader-confirmed and not yet professionally verified. No definitive parking conclusion is made.
